

A tensor T2 in Pytorch must
have T2.shape (3,2,2)

```
tensor([[[ 1,  4],  
         [ 7, 10]],
```

```
        [[ 2,  5],  
         [ 8, 11]],
```

```
        [[ 3,  6],  
         [ 9, 12]])])
```

T2[2,1,0] is tensor(9)
